Audio-books: advantages and disadvantages.
 Nowadays, in time of modern technologies, audio-books are irreplaceable part of people's lives. They are practically replaced usual books because it is believed that audio-books are more convenient ones.

Personally, I think that audio-books are truly more convenient than printed ones. To begin with, they do not take much space and they are not heavy. Audio-books are just a recordings saved on your phone, they can not be inconvenient. What is more, you can listen ^{to them} ~~it~~ everywhere because all you need to use it is headphones and your smartphone.

However, some people disagree with the idea that audio-books have many pluses. They say that listening audio-books using headphones have a bad influence on your ears because of due to the too high sound of the recording and too long period of listening.

As for me, I think that using headphones needable for listening books is not their disadvantage. Headphones allow people get information everywhere at any time. You can easily make the sound lower and set the time you can listen to a book to be on the safe side.

To sum it up, for me audio-books are 'truly great humanity' inventions. I think they are extremely convenient and even better than printed ones.
